

2012-2013 STUDENT MEDICAL KIT ORDER FORM

For several courses in the Basic Sciences program, you need to have the professional diagnostic instruments and other related equipment listed below. If you choose to purchase the Medical Kit through the University (\$1149.00), it is advisable to order the kit at least 6 weeks before you matriculate. This will ensure timely delivery of the kit to Statia for use as of 1st term. *Note: Items in the Medical Kit are not available for individual sale through the University, except for the lab coats and scrub sets. Those items are for sale at the Administration office on Statia.*
